

How we NAVIGATE in SCIENCE

- Work with us. We are here to help you succeed.
- Let's all work together, let's get on with it, to ensure you hit your target.
- Follow the expectations and rules set by our school and science.
- Be curious and ask mad questions and be a champion of science and of our school.

How we ILLUMINATE in SCIENCE

- Ensure you leave the classroom ensuring you understand. If you don't, ask another student, ask science staff.
- Don't give up. Have a go and seek to find those answers.
- Listen and act on feedback. We have been in your shoes and know how to help you get even better or back on track.
- Change happens, work gets harder. Embrace it by enjoying the challenge.

How we SHELTER in SCIENCE

- Support other students when they need it.
- Consider staff – they are human too!
- Talk to a staff member if you are unhappy. Don't blame others. Sort it out.
- Listen to understand other people's opinions and try to understand their views.
