

Information about Remote Learning

What I can expect if my child is working at home.

Remote education provision: information for parents

This information is intended to provide clarity and transparency to pupils and parents or carers about what to expect from remote education if local restrictions require entire cohorts (or bubbles) to remain at home.

For details of what to expect where individual pupils are self-isolating, please see the final section of this page.

The remote curriculum: what is taught to pupils at home

What should my child expect from immediate remote education in the first day or two of pupils being sent home?

At JCSC we provide instant access to the curriculum from your child's first day of absence. All lessons are uploaded to the Google Classroom which your child is familiar with working. You can track your child's work using Google Guardians.

In the case of a full year group working remotely (lockdown or isolation) then live lessons will be delivered using the Google classroom. Live lessons mean that teaching staff will be available to support students, this does not always mean that face to face delivery via video conferencing will be available.

Will my child be taught broadly the same curriculum as they would if they were in school?

At JCSC we teach the same curriculum remotely as we do in school. Materials are posted to support your child to access all five lessons throughout the day.

Depending upon the age of your child and the subject they are studying this may look different.

Remote teaching and study time each day

How long can I expect work, set by the school, to take my child each day?

We expect that remote education (including remote teaching and independent work) will take pupils broadly the following number of hours each day:

At JCSC we value all areas of the curriculum so feel it is essential to provide students with a broad and balanced curriculum offer at all key stages whether they can attend school in person or not. Our home learning curriculum directly mirrors that delivered in school.		
	If your child is isolating and school is operating as normal	In the case of a full lockdown
Years 5 and 6 students	<p>25 hours per week-</p> <p>Students who access Read Write Inc or other literacy interventions will be given access to Lexia to support them to continue to develop their literacy skills from home.</p> <p>Students will be able to continue to access Timetable Rock Stars and Reading Plus from home.</p>	At least 4 hours of remote education will be delivered daily.
Year 7- 11	<p>25 hours per week</p> <p>Students will be set work either weekly or daily depending upon the subject. Work will be provided for all of the subjects students would access if they were attending school in person.</p>	At least 5 hours of remote education will be provided in 45 minute lessons across the day. This may include a registration period and additional enrichment activities at the end of the school day.
Sixth form students	Variable depending upon curriculum choice	Variable depending upon curriculum choice

	At JCSC we expect our sixth form students to be able to work more independently. Where face to face lessons are scheduled work will be provided or live lessons delivered. It is the expectation students, if they are well enough, continue with their independent study.

Accessing remote education

How will my child access any online remote education you are providing?

All of the resources required to access school remotely will be uploaded to the Goggle Classroom.

The following information will support you to access it if you are experiencing difficulties:

<https://www.jcsc.co.uk/home-learning/>

If my child does not have digital or online access at home, how will you support them to access remote education?

We recognise that some pupils may not have suitable online access at home. We take the following approaches to support these pupils to access remote education:

If parents contact school to inform us digital access is a difficulty every attempt is made to support the family to rectify the difficulty:

A limited number of lap tops can be loaned to families on a short-term basis

Key boards can be loaned to families so that students can access their Google Classroom using a games console

Paper resources can be provided should both of these methods be unsuccessful, this must be a last resort.

How will my child be taught remotely?

We use a combination of the following approaches to teach pupils remotely:

- Live teaching (online lessons) - this is more common with older students such as year 11 or sixth form when school is operating as normal.
- Recorded teaching - video/audio recordings made by your child's teachers
- Providing work books
- Links to commercially available resources such as Oak Academy
- Access to school computer packages such as Educake, Times Table Rockstars or Reading Plus (full details available on the website)

Engagement and feedback

What are your expectations for my child's engagement and the support that we as parents and carers should provide at home?

At JCSC we recognise the challenges of supporting your child to work at home so we aim to provide scaffolds and supports to enable your child to learn successfully as independently as possible.

It is important that you support your child to create a learning plan on their first day of absence. It is often most effective if your child follows their usual timetable, this helps your child structure their learning and keep their usual routine.

Work will be set for every lesson they will study in school therefore it is best to follow the school timetable.

How will you check whether my child is engaging with their work and how will I be informed if there are concerns?

When whole year groups are working at home or during a lock down situation each member of staff will take a register for every lesson. If your child does not attend their remote learning session this will be recorded as a C1, you will then receive an alert via the Bromcom App.

If your child is isolating their work will be provided via Google Classroom. If they have not completed the required work by the end of each day the teacher will update their register with a C1- non-engagement in online learning and an alert will be sent to you via the Bromcom App.

How will my child receive feedback?

At JCSC we recognise feedback can take many forms and may not always mean extensive written comments for individual children.

Your child's work may be assessed and feedback given in a variety of ways. This may include:

- Electronic quizzes that will give instant feedback
- Submission of a google document through the Google Classroom
- Live feedback using verbal feedback or feedback using the chat option.

This is not an exhaustive list and may vary depending upon the topic and subject being taught.

Additional support for pupils with particular needs

How will you work with me to help my child who needs additional support from adults at home to access remote education?

We recognise that some pupils, for example some pupils with special educational needs and disabilities (SEND), may not be able to access remote education without support from adults at home. We acknowledge the difficulties this may place on families, and we will work with parents and carers to support these pupils in the following ways:

If your child has additional needs the following support will be given:

You and your child will be contacted by a member of the SEND team on their first full day of absence. You will be asked if your child is having any difficulties accessing their remote learning resources. If you identify difficulties this will be fed back to your child's class teacher to provide additional support.

Remote education for self-isolating pupils

Where individual pupils need to self-isolate but the majority of their peer group remains in school, how remote education is provided will likely differ from the approach for whole groups. This is due to the challenges of teaching pupils both at home and in school.

If my child is not in school because they are self-isolating, how will their remote education differ from the approaches described above?

If your child is isolating and needs to access remote learning from home their work will be posted in the Google Classroom from the first day of their absence. The work will, as much as possible, reflect the lesson that is being taught in the classroom.

For some students a live lesson via Google Classroom will be offered, the individual teacher will decide on the most effective mode of delivery.
