

GEOGRAPHY

Year	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
12	<p>Coastal Environments This focuses on dynamic environments in which landscapes develop by the interaction of winds, waves and currents. We develop an informed appreciation of the beauty and diversity of coasts and their importance as human habitats</p> <p>Contemporary Urban Environments A study into urban growth and change which are seemingly ubiquitous processes and present significant environmental and social challenges for human populations.</p>		<p>Natural Hazards A study of a range of different hazards such as tectonic, seismic, meteorological and wildfire. It will look at their causes, effects and how humans can reduce their impacts</p>		<p>Water and Carbon A study of the major dynamic cyclical relationships and processes on our planet. You will appreciate their magnitude and their significance at a variety of scales to human populations.</p> <p>Non-Examined Assessment</p>	
13	<p>Global Governance A study of globalisation and the economic, political and social changes associated with technological and other driving forces which have been a key feature of the global economy and society in recent decades. Non-Examined Assessment</p>		<p>Changing Places This unit focuses on people's engagement with places, their experience of them and the qualities they ascribe to them, all of which are of fundamental importance in their lives.</p> <p>Non-Examined Assessment</p>
